

## Smart911

"Smart911" is now in Collier County. Residents should go to [smart911.com](http://smart911.com) to input their information regarding their situation and health needs, in order for the 911 call center to respond with their personal information. Collier County has just got this up and running. It is a "smart" thing to do to have your information on file with the 911 operator in order to make them aware of your health information when you dial that 911 call center. You may need to wait until you are back in the community. Please make yourself a reminder upon your return.

This is something you really need to consider.
